Setting up the Belkin Thunderbolt™ 3 Express Dock HD, F4U095

The **Belkin Thunderbolt™ 3 Express Dock HD, F4U095** is an all-in-one docking solution that connects all your peripherals and powers your computer with a single cable. This article will guide you on how to install the Belkin F4U095.

NOTE: Make sure that your host device (laptop or computer) has the latest driver information. Visit the host device manufacturer's website to make sure you have the latest updates.

Step 1:
Connect the AC power cable to the included power supply unit.

Step 2:
Plug the power supply into the wall.

Step 3:
Plug the power supply into the Belkin Thunderbolt™ 3 Express Dock HD.

NOTE: Before connecting the dock to your computer, connect all your preferred devices to the Ethernet, Audio, USB 3.0, DisplayPort™ and Thunderbolt™ 3 ports. You may use one of the Thunderbolt™ 3 ports for your devices but make sure that the remaining Thunderbolt™ port must be left open to connect the dock to your computer.

Step 4:
Connect one end of the Thunderbolt™ cable into the open Thunderbolt™ 3 port on the dock.

Step 5:
Plug the other end of the cable into your computer.

Step 6:
Turn **ON** your computer.
